INCIDENT BULLETIN — November 2015

032. Incident on children's coaster in US

An incident is reported to have taken place on a children's coaster manufactured by Wisdom Industries in the US. The ride is the Dragon Wagon and was in operation at a fair in Waterville run by Smokey's Great Shows of Maine.

The ride features trailored carriages and a coupling between the two failed. This bulletin reminds us of the need for a secondary fixing for couplings of this nature. It should also stop couplings from 'digging down.'
