INCIDENT BULLETIN — February 2017

## **049. Mouse Trap roller coaster**

A seat belt on the Mouse Trap roller coaster at Wonderland Amusement Park in Amarillo, Texas, US, apparently released during a ride resulting in a 6-year-old boy sliding out of his seat. The boy's father is reported to have then hung on to the boy to stop him falling from the ride until it stopped.

The father was videoing the ride at the time and caught the incident on camera as can be seen in the link below.
