INCIDENT BULLETIN — February 2017

## **056. Super Shot accident**

Following an accident earlier in 2016 which occurred on an A.R.M. Super Shot ride from which a woman fell 40ft during a ride cycle, reports suggest that A.R.M. has reported the ride itself was not at fault for the incident, but the company which brought the ride to the event where it was in operation and who had assembled it there. A spokesman for A.R.M. stated that the sole cause of the accident was a failure to properly assemble the ride before use. The statement was made based on information from post-accident inspectors who viewed the ride.
