## Playground swing fatality in Malaysia

NAFLIC has received a report of a 15-year-old girl dying after receiving head injuries in a freak accident involving a playground swing in a town near Kuala Lumpur, Malaysia.

It is believed that the victim's head became lodged between steel bars on a platform swing which is meant for disabled or wheelchair users.

The incident highlights trap points and unforeseen trap points where one may not think there is a potential issue. It also shows that hazards can exist in the most innocuous of equipment.
